Mahmoud Hussein Abdul Ghani

Full-Stack Software Engineer

Tripoli, Lebanon • +961 76 364 340 • Mahmoud.Abdulghani@outlook.com • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Full-stack software engineer building type-safe web applications, REST APIs, authentication systems, and relational/NoSQL data solutions using React, Next.js, TypeScript, Node.js, Express.js, and Python frameworks. Focused on maintainable architecture, secure integrations, testing, CI/CD, and practical AI application features.

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern — The Digital Hub, UNRWA, Beirut, Hybrid — Jun 2026 – Sep 2026

- Completed a full-stack software engineering and AI program focused on modern architecture and production-ready applications.
- Developed type-safe React and Next.js apps; built REST APIs using Node.js, Express.js, FastAPI, and Django REST.
- Implemented MongoDB/Mongoose and SQL data layers, JWT authentication, RBAC, validation, and unit testing with Vitest.
- Applied SOLID principles and clean architecture in Agile teams; deployed applications with Vercel and Render.
- Integrated AI-powered features into full-stack web applications using LLMs, RAG and AI APIs.
- Gained hands-on experience using AI coding agents effectively to accelerate development, debugging, refactoring, testing, and code review while maintaining code quality and understanding of the generated code.

Backend Developer — Ishtari Group, Tripoli, Onsite — Dec 2025 – Jan 2026

- Developed PHP MVC modules with search, filtering, pagination, reporting, and AJAX-driven administration interfaces.
- Wrote MySQL and MariaDB queries for product, category, order, cost, price, and profit reporting.

PROJECT EXPERIENCE

JobPilot AI | Live Demo

- Synthetic long project fixture phrase.

Lobby | GitHub | Live Demo

- Co-developed a real-time communication platform for persistent communities and temporary guest rooms. Contributed to authenticated and guest access, invitation links, validation, and Supabase-backed services.

GameZone Arena | GitHub | Live Demo

- Co-developed a gaming-arena reservation platform with live availability and conflict prevention. Contributed to frontend and backend integration across bookings, payments, rooms, devices, and users.

TECHNICAL SKILLS

Languages & Web: TypeScript, JavaScript, Python, PHP, HTML5, CSS3, SQL
Frontend: React.js, Next.js, Angular, Tailwind CSS, Zustand, TanStack Query, Vite, Framer Motion
Backend & APIs: Node.js, Express.js, NestJS, FastAPI, Django, Django REST Framework, RESTful APIs
Databases & ORM: PostgreSQL, MySQL, MariaDB, MongoDB, Mongoose, Supabase, SQLAlchemy, Alembic
Auth & DevOps: JWT, RBAC, Argon2, Git, GitHub, CI/CD, Vercel, Render
AI: LLMs, RAG, Prompt Engineering, AI API Integration
Architecture & Testing: Clean Architecture, SOLID, Design Patterns, Scalable Systems, Pytest, Vitest, Jest

EDUCATION & TRAINING

Bachelor of Science in Computer Science — ***Lebanese International University*** *(LIU)* **Oct 2022 – Jun 2025**
AWS re/Start Bootcamp – Cloud Computing & DevOps Fundamentals — *Amazon Web Services* **Jul 2025 – Oct 2025**

LANGUAGES

Arabic: Native | **English:** Professional Working Proficiency
