Mahmoud Hussein Abdul Ghani

Full-Stack Software Engineer

Mahmoud.Abdulghani@outlook.com +961 76 364 340 Tripoli, Lebanon
linkedin.com/in/MahmoudAbdulGhani github.com/MahmoudAbdulGhani

PROFESSIONAL SUMMARY

Full-stack software engineer building type-safe web applications, REST APIs, authentication systems, and relational/NoSQL data solutions using React, Next.js, TypeScript, Node.js, Express.js, and Python frameworks. Focused on maintainable architecture, secure integrations, testing, CI/CD, and practical AI application features.

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern Jun 2026 – Sep 2026

The Digital Hub, UNRWA, Beirut, Hybrid

Beirut, Hybrid

Full-stack software engineering and AI program focused on production-ready applications and collaborative delivery.

- Completed a full-stack software engineering and AI program focused on modern architecture and production-ready applications.
- Developed type-safe React and Next.js apps; built REST APIs using Node.js, Express.js, FastAPI, and Django REST.
- Implemented MongoDB/Mongoose and SQL data layers, JWT authentication, RBAC, validation, and unit testing with Vitest.
- Applied SOLID principles and clean architecture in Agile teams; deployed applications with Vercel and Render.
- Integrated AI-powered features into full-stack web applications using LLMs, RAG and AI APIs.
- Gained hands-on experience using AI coding agents effectively to accelerate development, debugging, refactoring, testing, and code review while maintaining code quality and understanding of the generated code.

QA Intern May 2026 – Aug 2026

Oigetit

Application quality assurance focused on reproducible defects and clear engineering feedback.

- Tested application workflows and documented reproducible defects with clear expected and actual behavior.
- Used application logs to support failure analysis and verification.

Backend Developer Dec 2025 – Jan 2026

Ishtari Group, Tripoli, Onsite

Tripoli, Lebanon

Backend development for production administration and reporting systems.

- Developed PHP MVC modules with search, filtering, pagination, reporting, and AJAX-driven administration interfaces.
- Wrote MySQL and MariaDB queries for product, category, order, cost, price, and profit reporting.

Web Development Trainer Apr 2025 – Jun 2025

KfW & EU Graduate Support Program | FALA Association

Web development mentoring through the KfW and EU Graduate Support Program at FALA Association.

- Mentored developers in programming logic, component-based workflows, and practical web development.
- Guided learners through industry-standard project structure and deployment practices.

PROJECT EXPERIENCE

JobPilot AI — Discover opportunities. Prepare your application. Practise your interview.

Next.js, React, TypeScript, Python, FastAPI, Pydantic, PostgreSQL, SQLAlchemy, Alembic, Supabase, OpenAI API, Docker, pytest, Vitest, Playwright, Vercel, Render, Git, GitHub

- Built a privacy-conscious AI job-search platform with CV extraction, profile suggestions, saved jobs, job discovery, application tracking, consent controls, and review-before-apply workflows. (Tech: Next.js, React, TypeScript, FastAPI, Python, PostgreSQL, SQLAlchemy, Alembic, Supabase, OpenAI API, Docker, Vercel, Render, Pytest, Vitest)

Live Demo: ***https://jobpilot-ai-omega.vercel.app/***
Repository: ***https://github.com/MahmoudAbdulGhani/jobpilot-ai***

Lobby — Persistent communities, temporary guest rooms and live voice.

Angular 22, NestJS 11, TypeScript, Supabase, LiveKit, Tailwind CSS

- Co-developed a real-time communication platform for persistent communities and temporary guest rooms. Contributed to authenticated and guest access, invitation links, validation, and Supabase-backed services.

Live Demo: ***https://lobby-hub.vercel.app/***
Repository: ***https://github.com/Ahmad-khalaf517/lobby***

GameZone Arena — Live availability, online bookings and payments for a gaming arena.

Next.js 16, React 19, TypeScript, MongoDB, Tailwind CSS, JWT, OTP, Stripe

- Co-developed a gaming-arena reservation platform with live availability and conflict prevention. Contributed to frontend and backend integration across bookings, payments, rooms, devices, and users.

Live Demo: ***https://gaming-arena-reservation-system.vercel.app/***
Repository: ***https://github.com/MahmoudAbdulGhani/Gaming-Arena-Reservation-System***

Cedar Construction — Integrated construction project management and accounting platform

Python, Django, Django REST Framework, PostgreSQL, Supabase, Groq, Docker, Gunicorn, WhiteNoise, JWT, ReportLab, HTML, CSS, JavaScript, Git, GitHub, Render

Full-stack Django construction management and accounting platform integrating project planning, budgeting, procurement, inventory, expenses, invoicing, payments, accounting, reporting, and AI capabilities, with Docker/ Gunicorn production deployment.

- Developed and enhanced a full-stack Django platform integrating construction project management, procurement, inventory, expenses, invoicing, payments, accounting, and financial reporting workflows.
- Integrated AI capabilities using Groq to extend the platform with AI-powered functionality.
- Implemented production deployment architecture using Docker, Gunicorn, PostgreSQL, and WhiteNoise.
- Designed and integrated modular business workflows across multiple Django applications with centralized database-backed operations.
- Improved production readiness through security configuration, environment management, static asset handling, automated testing, and deployment validation.

Live Demo: ***https://construction-project-management-sa22.onrender.com/***

Repository: ***https://github.com/MahmoudAbdulGhani/Construction-Project-Management-Accounting-System***

UniHub — Dedicated portals for students, professors and administrators.

React, Node.js, Express.js, MongoDB, REST APIs, JWT, Tailwind CSS

University management system with role-based academic portals and JWT-protected workflows.

- Contributed the student portal for course enrollment, assignment submission, attendance, and grade visibility.
- Integrated protected React workflows with a Node.js, Express.js, MongoDB, and JWT REST API.

Live Demo: ***https://university-management-system-three-fawn.vercel.app/login***

Repository: ***https://github.com/MahmoudAbdulGhani/university-management-system***

User Management — Secure full-stack user management with FastAPI, React, and PostgreSQL.

Python, FastAPI, Pydantic, React, Vite, React Router, Tailwind CSS, Axios, Framer Motion, PostgreSQL, SQLAlchemy, Alembic, JWT, Argon2, Pytest, Postman, Newman, Vercel

Built a full-stack user management platform with FastAPI and React, implementing JWT authentication, RBAC, admin user management, PostgreSQL persistence, soft deletion, and automated API testing.

- Built a full-stack user management platform with FastAPI, React, PostgreSQL, JWT authentication, and role-based access control.
- Implemented admin user management, soft deletion, database migrations, and automated API testing with Pytest and Postman/Newman.

Live Demo: ***https://fastapi-user-management.vercel.app/***

Repository: ***https://github.com/MahmoudAbdulGhani/fastapi-user-management***

Medicare Hub — Patient records, schedules and role-based clinic workflows.

PHP, MySQL, Bootstrap, JavaScript, PHPMailer

Clinic management platform for appointments, patient records, schedules, and role-based staff workflows.

- Implemented appointment and clinic workflows for patients, doctors, receptionists, pharmacists, and administrators.
- Added emailed OTP password recovery and notifications using PHPMailer.

Live Demo: ***https://clinic-management-system.kesug.com/***

Repository: ***https://github.com/MahmoudAbdulGhani/Clinic-management-system***

Home Services — A pixel-faithful landing page built from a Figma design.

React, Vite, Tailwind CSS, JavaScript, Responsive Design

Responsive React landing page implemented from a professional Figma design during the Digital Hub internship.

- Built reusable React components and responsive layouts for desktop, tablet, and mobile breakpoints.
- Translated the supplied Figma system into a Tailwind CSS interface with mobile navigation.

Live Demo: ***https://home-services-coral.vercel.app/***

Repository: ***https://github.com/MahmoudAbdulGhani/home-services***

EDUCATION

Bachelor of Science in Computer Science Oct 2022 – Jun 2025

Lebanese International University (LIU)

Graduated with a BSc in Computer Science.

TECHNICAL SKILLS

Backend

- Pydantic

Authentication & Security

- CSRF Protection
- Argon2 Password Hashing
- Authentication & Authorization
- Secure Cookies
- OTP Verification
- Zod

Backend & APIs

- Node.js
- Express.js
- FastAPI
- Django
- Django REST Framework
- NestJS
- RESTful APIs

Auth & DevOps

- JWT
- RBAC
- Argon2
- Git
- GitHub
- CI/CD
- Vercel
- Render

Testing

- pytest
- Playwright
- Unit & Integration Testing
- Postman

Languages & Web

- HTML5
- CSS3
- JavaScript
- TypeScript
- Python
- PHP
- SQL

Databases & ORM

- MySQL
- MongoDB
- Mongoose
- MariaDB
- PostgreSQL
- Supabase
- SQLAlchemy
- Alembic

DevOps & Version Control

- GitHub Actions
- Docker

AI

- Structured Outputs & JSON Schema
- LLMs
- RAG
- Prompt Engineering
- AI API Integration
- AI API Integration — OpenAI

Frontend

- React.js
- Next.js
- Zustand
- TanStack Query
- Angular
- Tailwind CSS
- Responsive Design
- Vite
- Framer Motion

Architecture & Testing

- Jest
- Vitest
- SOLID
- Design Patterns
- Scalable Systems
- Clean Architecture

Architecture

- Real-time Systems

TRAINING & CERTIFICATIONS

AWS re/Start Bootcamp – Cloud Computing & DevOps Fundamentals Jul 2025 – Oct 2025

Amazon Web Services

Full-Stack Web Development 4-month program

youbee.ai

LANGUAGES

Arabic: Native

English: Professional Working Proficiency
