Objective

Software engineer crafting responsive React and Angular interfaces backed by Node.js and NestJS APIs, MongoDB and Supabase data layers, and real-time communication — through collaborative engineering at The Digital Hub by UNRWA. I care about secure authentication, clean APIs, responsive interfaces, and software that stays understandable after launch.

Professional Experience

Full-Stack Developer

The Digital Hub by UNRWA — Training Program

- Collaborative full-stack development across three shipped products: GameZone Arena (Next.js, TypeScript, MongoDB, Stripe), Lobby (Angular, NestJS, Supabase, LiveKit) and UniHub (React, Node.js, Express, MongoDB).

Backend Engineering Layer

12/2025 — 01/2026

Ishtari Group

- Engineered scalable MVC backend components, managed relational schemas, and structured secure RESTful API systems.

Quality Assurance Engine

05/2026 — Present

Oigetit

- Conducted continuous boundary testing, trace-level log debugging, and evaluated system flows to catch and fix core script anomalies.

Web Development Trainer

04/2025 — 06/2025

KfW & EU Graduate Support Program | FALA Association

- Mentored developers on procedural engineering logic, component workflows, and industry-standard deployment structures.

Projects

Lobby — Persistent communities, temporary guest rooms and live voice.

Angular 22, NestJS 11, Supabase, LiveKit Cloud, TypeScript, Tailwind CSS, Zod, pnpm Workspaces

- Authenticated users: persistent identity, communities, servers and channels
- Guest access to temporary rooms through invitation links
- Real-time messaging, audio and screen sharing via LiveKit Cloud
- TypeScript monorepo (pnpm workspaces) with shared contracts across frontend and backend

Live Demo: <https://lobby-hub.vercel.app/>

Repository: <https://github.com/Ahmad-khalaf517/lobby>

GameZone Arena — Live availability, online bookings and payments for a gaming arena.

Next.js 16, React 19, TypeScript, Tailwind CSS 4, MongoDB, JWT + OTP, Stripe, Nodemailer / SMTP

- Five-gate auth flow: registration to OTP to verification to JWT to protected routes
- Time-slot conflict detection prevents overlapping room and device bookings
- Stripe card and cash-at-desk payments with admin approval, loyalty rewards and no-show policy
- Admin command center for rooms, devices, bookings, payments, users and reports

Live Demo: <https://gaming-arena-reservation-system.vercel.app/>

Repository: <https://github.com/MahmoudAbdulGhani/Gaming-Arena-Reservation-System>

UniHub — Dedicated portals for students, professors and administrators.

React, Node.js, Express.js, MongoDB, REST APIs, JWT Auth, Tailwind CSS

- Student portal: course enrollment, assignment submission, attendance and grades
- Professor portal: course management, assignments, exams, grading and announcements
- Admin portal: user management, approvals and platform administration
- JWT-protected REST API with role-based access control

Live Demo: <https://university-management-system-three-fawn.vercel.app/login>

Repository: <https://github.com/MahmoudAbdulGhani/university-management-system>

Medicare Hub — Patient records, schedules and role-based clinic workflows.

PHP, MySQL, Bootstrap, JavaScript, PHPMailer

- Appointment booking and confirmation across medical specialties
- Role-based dashboards covering patients, doctors, receptionists and pharmacy
- Password recovery with emailed OTP codes and PHPMailer notifications

Live Demo: <https://clinic-management-system.kesug.com/>

Repository: <https://github.com/MahmoudAbdulGhani/Clinic-management-system>

Home Services — A pixel-faithful landing page built from a Figma design.

React, Vite, Tailwind CSS, JavaScript, Responsive Design

- Pixel-perfect implementation of a professional Figma UI kit
- Responsive across desktop, tablet and mobile with mobile sidebar navigation
- Component-based React architecture styled with Tailwind CSS

Live Demo: <https://home-services-coral.vercel.app/>

Repository: <https://github.com/MahmoudAbdulGhani/home-services>

Phone Store — Storefront and admin catalog on a custom PHP MVC stack.

PHP, MySQL, JavaScript, CSS3, Session Auth

- Product catalog, search and cart managed through PHP sessions
- Admin catalog control with inventory management
- Parameterized SQL queries to protect database communication

Repository: <https://github.com/MahmoudAbdulGhani/Phone-Store-Website>

Education

Bachelor's Degree in Computer Science

10/2022 — 06/2025

Lebanese International University (LIU)

Tripoli, Lebanon | Cumulative GPA 3.30 / 4.00

Skills

Frontend

- React.js
- Next.js
- Angular
- TypeScript
- Tailwind CSS
- Responsive Design

Backend

- Node.js
- Express.js
- NestJS
- PHP
- REST APIs
- JWT Authentication
- Role-Based Access (RBAC)
- Real-time Systems

Data

- MongoDB
- PostgreSQL
- MySQL / MariaDB
- Supabase
- Database Design
- Parameterized SQL

Tools

- Git / GitHub
- Stripe
- Nodemailer / SMTP
- LiveKit
- Zod
- Postman
- Agile / Scrum
- OpenAPI / Swagger

Certifications & Training

Software Engineering Internship

2026 — Present

The Digital Hub (UNRWA Training Program)

AWS re/Start Bootcamp — Cloud Computing & DevOps Fundamentals

80 Days

Amazon Web Services

Full-Stack Web Development

4 Months
